

Solar Productivity: We Are Gaining

Preliminary data show that our solar system is producing more electricity than we are presently using. Great News! In 2021 we paid \$2,707.67 for months of June, July and August, this year we were billed 0. And We Are **Saving the Planet**. We are doing net-metering and we have accumulated 6,630 kWh to be applied to the months we make less than we use. Just look at all the solar we created below for month of Sept.

Bar graph shows Daily Solar for September.
